

CHOUB VICHET

FULL STACK DEVELOPER | PHNOM PENH, CAMBODIA

choubvichet1001@gmail.com | 085251742 | <https://portfolio.choubvichet.site/>

SUMMARY

Final-year Information Technology Engineering student at the Royal University of Phnom Penh (RUPP) with experience in both frontend and backend development. Passionate about building modern web applications, solving technical challenges, and continuously learning new technologies. Seeking opportunities to apply and expand my skills as a Frontend, Backend, or Full-Stack Developer.

TECHNICAL SKILLS

Front-End Development: HTML5, CSS3, JavaScript, TypeScript, React, Vue, Tailwind CSS

Back-End Development: Node.js, Express.js, Laravel, Spring Boot

Databases & Tools: Supabase, Firebase, Git, GitHub Actions

TECHNICAL PROJECTS

Move Smart (Website)

January – March 2026

The platform allows users to easily manage delivery requests, track deliveries in real time, and ensure smooth communication between customers and delivery operators.

Move Smart (Mobile)

April – June 2026

A mobile delivery application allows users to easily manage delivery requests, track deliveries in real time, and ensure smooth communication between customers and delivery operators.

The Career Bound Job Application Tracker (Website)

May – June 2026

Job Application Tracker is a web-based platform that helps users organize, track, and manage job applications, interviews, and deadlines in one centralized dashboard.

KhSbay (Website)

April – May 2025

KhSbay is a movie browsing web application that allows users to explore and discover movies in a simple and user-friendly interface. The platform provides an organized layout for viewing movie details, categories, and trending content.
